Rabbit Embryo Culture Medium

Cat # RbEmCult-01: 10 mL x 10 Vials (100 mL) $195 plus S&H

Description of the product

The upgraded rabbit special culture medium (RbEmCult) is used for culture of rabbit fertilized eggs, NT embryos in vitro. The RbEmCult medium contains 3 mg/mL BSA, 2.5% FBS, and ready to use. The embryos are cultured at 5% CO₂ in humidified air at 38.5°C (see reference: Du F, et al., Beneficial effect of young oocytes in rabbit somatic cell nuclear transfer. Cloning and Stem Cells 2009; 11(1):131-140). Animal embryos tested, and qualified.

RbEmCult medium is shipped on wet ice, and should be stored at 2-8°C upon arrival. The medium is recommended to use within three months.
